Always exciting unique ideas and passionate designs...

Çebi carries its signature to living spaces since 1979 with the theme of passion and perfection that feeds its original, refined and above-the-line designs. Çebi combines the gains of his long history in the sector with her deep experience with knowledge and expertise. With its privileged quality and unique design variety, it has been accomplishing the difficult for years. It makes innovative touches to decorations with its original collections represented by design and style.

With an original perspective and a natural interpretation, Çebi designers accompany architectural philosophies with harmony of proportion and balance.

Çebi believes that mediocrity will be broken by a design difference and comfort-oriented fiction. It reveals its originality through its innovative collections with a wide selection. Çebi, one of the leading companies in its field in Turkey, defines sophisticated lifestyle with timeless bright designs in its stylish collections. In order to take its products to the highest possible level, it continues its design and collection work continuously, taking into account functionality and ergonomics. Çebi closely follows popular architectural approaches, interior architecture, and furniture trends. She brings her colors to her designs and collections, reflecting the spirit of the time. In this way, it complements all modern and classic style venues in an "always exciting" way.

The Empire Collection is inspired by the symbolic forms and symbols of great civilizations that make up the common past of humanity. Joy Collection, on the other hand, addresses today's dynamism by processing new materials with a young spirit. Çebi designs with timeless lines receive support from architectural design trends and innovative approaches that change habits. Traditional and modern elements are harmoniously exhibited in each product, which captures a stylish harmony by blending aesthetic accumulation and contemporary trends. Rich, eye-catching, chic, striking, bright and fun designs that emphasize the elitism of Çebi's identity perfectly fit into all architectural concepts that are environmentally friendly and sustainable.

Çebi does not offer "only design" to living spaces and projects. Çebi extends its collections and products far beyond "just design" with its excellence in shaping, coating quality and durability, as well as excellent surface quality and smoothness, which are symbols of its professionalism. It maintains environmental sensitivity at every stage from raw material selection to production processes and uses renewable energies. With a sense of responsibility to the nature and future generations, it conducts afforestation activities to reduce its carbon footprint in the world. Unique designs are an integral part of furniture and life in the world of Çebi. It gives passion and inspiration to those who want more...
